

#### What does GCL do?

GCL targets at making PV-generated electricity affordable and inclusive for the publicby its constant technology innovations in polysilicon, silicon wafers, cells, modules, system integration and photovoltaic power plants, continuous improvement of its management, regional layout and green energy certification systems.

#### What is a GCL module?

A GCL module is a residential solar power solution from GCL, best suited for homes. The G-Home Solar Kit from GCL includes energy storage and home energy management systems (HEMS), enabling homeowners to store solar energy throughout the night.

### Does GCL-Si have a 320 W perovskite solar module?

GCL-SI has launched a new 320 W perovskite solar module. The company guarantees that the 10-year end power output will be at least 90% of the nominal output power, which decreases to 80% after 25 years. GCL System Integration (GCL-SI), the PV panel unit of GCL Group, unveiled a perovskite solar module at the SNEC trade show in Shanghai in May.

#### When will GCL integration start manufacturing solar panels?

GCL Integration expects to begin manufacturing activities at the new facility in October. With the new factory, its total solar panel manufacturing capacity will reach 30 GW. The company also announced plans to raise CNY 6 billion through a private placement of shares.

#### What will GCL manufacture?

GCL's factory will produce silicon wafers, photocells, modules, and other components such as junction boxes, back sheets, glass, EVA layers, and aluminum frames-- everything needed to manufacture a completed solar panel. Last November, GCL partnered with US based Powin Energy to expand into the Asian energy storage market.

#### Why should I choose a GCL modular system?

GCL's modular system is versatile and best suited for all kinds of applications, including residential use. The G-Home Solar Kit is a perfect power plan for your homethat combines energy storage and home energy management systems (HEMS), allowing home owners to store solar energy throughout the night.

The panels can be used in PV systems with a maximum voltage of 1,500 V. The company offers a 30-year power output guarantee for 87.4% of the initial yield and a 12-year ...
