How to minimise fire risk from solar PV systems?

The solar industry welcomes clarity on how to minimise fire risk from solar PV systems, which in absolute terms is extremely low. "The core way to mitigate any risk is to ensure the highest possible quality in the design, installation, operation, and maintenance of solar systems.

Can photovoltaic panels be retrofitted?

Photovoltaic (PV) panels can be retrofitted on buildings after construction or can be used to replace conventional building materials used for roofs, walls or facades. Fire safety concerns include electrical ignition sources, combustible loading, and challenges for manual firefighting.

What is the best practice manual for rooftop solar photovoltaic systems?
