

Photovoltaic bracket installation manual

How to install a solar photovoltaic system?

The installer should conform to all the safety precautions listed in this guide when installing the module. Local codes should also be followed in such installations. Before installing a solar photovoltaic system, the installer should become familiar with the mechanical and electrical requirement for such a system.

How do I install a proteabacket?

Secure through the holes using the stainless-capped, self-piercing S-5! fasteners or Bulb-Tite rivets. The ProteaBracket is mounted directly onto the sides of the crown of the roof panel, enabling module or rail attachment anywhere along the ribs. *See more detailed installation instructions in the PDF download below.

Do you need a professional installer to install PV modules?

Professional installer must read these guidelines carefully and strictly follow these instructions. Failure to follow these instructions may result in death, injury or property damage. The installation and handling of PV modules requires professional skills and should only be performed by qualified professionals.

How do I install a solar stack?

Mark the lines across the roof for all the mounts. Prepare the Solar Stack pedestals and place them next to the marked lines where they will be installed. Surface Preparation. All roof surfaces must be free of any debris, dirt, grease, oil, and standing water before adhesive is applied. Follow adhesive manufacturers application instructions.

Do solar modules work with the Z-bracket mounting system?

Modules provided by other manufacturers may work with the Z-Bracket Mounting System provided the follow conditions are met: Solar module weight does not exceed 88 lbs (40 kg) or total load per bracket does not exceed 22 lbs (10 kg). Solar module framing material is constructed of an aluminum

How do I connect a solar stack module to a pedestal?

Modules should be bonded to the Solar Stack pedestals with the manufacturer approved middle/end clamps. Grounding hardware (as a part of the module clamps) forms secure electrical bonds with both the module and the pedestal, resulting in many parallel grounding paths throughout the system.

Our UL 3741 listing means you can install without MLPE devices. ... in situations where photovoltaic rack mounting systems penetrate roof covering systems. ... in accordance with either the International Building Code (IBC) or the ...

Mechanical installation methods such as bolt mounting with or without brackets for single-sided and double-sided components; Silicone mounting method for flexible solar panels on both flat and non-flat roofs; ...

Photovoltaic bracket installation manual

Mount the PV Disks and the EdgeGrab/standoff assembly to the first row of clamps. Install the first row of modules. Then install the MidGrab/standoff assembly & PV Disk on clamps or brackets. Place MidGrab/standoff/disk & ...

o Install PV modules appropriately according to corresponding mechanical load needs. Check the serial No. in the barcode with the packing list when unpacking. Provide ...

The Right Way™ to attach almost anything to metal roofs! 888-825-3432 Installation Instructions PV Kit 2.0 Installation Instructions S-5!® Warning! Please use these ...
