

Photovoltaic panel wooden box pallet

What happened to wood pallets for solar panels?

While performing rural solar installations in Northern Missouri, Luke Phelps and his team at a regional solar design and installation company quickly realized the amount of waste, lost time, and expense associated with the single-use wood pallets on which their solar modules were shipped to installation sites.

Will pvpallet revolutionize the way we ship solar panels?

At least that's our approach. PVpallet is the first solar shipping solution to revolutionize the way solar modules are handled and distributed.

What sizes does pvpallet offer?

Watch the Full Product Demo. PVpallet's solar panel pallet is available in two sizes. Series X is designed for solar modules between 63.5" and 83.5" in length. Series XL is designed for larger 90" modules. Custom sizing is available upon request.

What is the PVpallet Series X?

The PVpallet Series X allows for easier and safer deployment and decommissioning of solar microgrid systems. It also enables the acceptance and management of solar panel donations in a way that wasn't possible before. The fact that these units can be stacked two-high outside significantly increases storage capacity.

Why should you choose pvpallet?

PVpallet helps solar companies reduce waste, streamline operations, and save money through reusable packaging and turnkey logistics solutions. Why choose PVpallet? We're focused on making life easier for everyone in the solar supply chain--from manufacturers and distributors to EPCs and solar installers.
