

Selling solar power

Can you sell solar electricity to the power company?

So if I understand your question properly, you can make a solar farm and must sell it to the government, but you can't sell to a power company or directly to consumers.

Does solar power save energy at home?

The simple answer to the question "do solar panels really save you money?" is yes . That being said, how much you'll save depends on a number of factors. Direct hours of daily sunlight and the size and angle of your roof are both important, but local electricity rates play the biggest role in determining how much solar can save you.

Is solar power really good?

Solar power can be used to generate clean electricity, and the panels that collect the energy require very little maintenance. While the efficiency of solar panels decreases over the course of several years, it actually can produce an impressive amount of energy for decades.
