What are the different types of solar equipment?

Photovoltaic solar panels, Inverters, Racking, Balance of System Equipment, Battery Accessories, Charge Controllers, Energy Storage, Inverter Accessories, Generators, Wire & Cable, Electric Panels, Other Tools and Supplies Who are "Suppliers" ? Equipment manufacturers, distributors and solar service providers!

Can you buy a solar garden?

Customers can either purchase a share of a solar garden and own that portion of the overall array, or they can lease energy from the solar system and, in a sense, replace their monthly utility payments with monthly community solar payments that are typically at a lower price.

Do solar farms need energy storage?

Energy storage for solar farms can be costly. Solar panels only work when the sun is shining. So, like solar-plus-storage options for homeowners, utility-scale and community solar farms require storage technology like batteries to collect and preserve the excess energy generated by solar panels. This can get expensive.

What are the different types of solar farms?

There are two main types of solar farms around the country: utility-scale and community solar farms. The main difference between the two is their customers - utility-scale solar farms sell solar generation directly to public utilities. In contrast, community solar farms sell directly to end-consumers of electricity, such as homeowners and renters.
