How do I report a problem with my solar panel?

You can also review your solar panel owner documents for additional information. If you need to report an emergency related to your solar panel system, visit First Responders. Locate the relevant troubleshooting section below if you have received an alert from us, or if your system is experiencing a problem.

What happens if a PV module fails?

A PV module failure degrades its output power and reduces the performance and reliability of the overall system, and this may eventually cause a safety issue. Faults in PV systems can cause significant energy loss as well as fire hazards.

How does a solar system work?

So, take charge of the health and performance of your solar installation by following these proven steps and tips. The solar system components work together to convert sunlight into usable electricity for your home, business, or other applications.

Are battery storage systems a good option for off-grid solar installations?

Battery storage systems can be particularly beneficial for off-grid solar installations, where access to the electrical grid is unavailable or undesirable. With an off-grid system, stored energy is the sole source of electricity, requiring a robust battery bank and proper sizing to meet daily energy demands.

How do you maintain a solar power system?

Keep the battery area clean, dry, and well-ventilated, as well as maintaining a consistent temperature to protect the batteries from extreme environmental conditions. By following these cleaning and maintenance procedures, you can ensure that your solar power system remains efficient, safe, and durable in the long term.

What should I do if my solar system is not working?

Always switch off the solar system before performing any maintenance or repairs. This reduces the risk of electric shock and prevents unexpected equipment operation that could lead to dangerous situations. Use the appropriate personal protective equipment (PPE), such as insulated gloves, goggles, and other electrically-rated protective gear.
